

SAN DIEGO CHARGERS LASIK CENTER & TEAM OPHTHALMOLOGIST

For more than a decade, Dr. Mihir Parikh and his highly trained staff at Advanced Ophthalmology Institute have helped more than 10,000 San Diegans improve their vision with laser vision correction, including our hometown San Diego Chargers. Nearly everyone's heard about LASIK helping patients throw away their glasses and contact lenses, but the critical consideration is choosing a doctor with the experience, technology and personal care to help get the best results.

Patients of Dr. Parikh can expect the best LASIK technology and a personalized consultation from a caring team of experts. "LASIK has made incredible improvements in safety and accuracy," says Dr. Parikh. "It's

Advanced Ophthalmology Institute

critical that your ophthalmologist offers all the latest technologies and a customized eye care solution. LASIK is only one of a dozen procedures that might be the best choice for you."

Patients should be wary of bargain-basement centers. "Technology has rapidly advanced and bargain-priced LASIK centers often can't afford to invest in updating their equipment," Dr. Parikh explains. "We use the latest technology and offer customized treatments, which simply gets better results and happier patients."

Like many wise investments, LASIK pays for itself in a few years. "When you consider the cost of glasses and contacts, LASIK is a very cost-effective alternative and generally safer than wearing contact lens," says Dr. Parikh.

Entering his sixth season as the San Diego Chargers' official team ophthalmologist and LASIK surgeon, Dr. Parikh is humbly proud of his LASIK results for the players. "We love our partnership with the Chargers," says Dr. Parikh, who has performed LASIK on dozens of Charger players, coaches, executives, cheerleaders and their families. "But whether we are treating the Chargers or their fans, it's wonderful hearing patients brag about the clarity of their LASIK vision. To us, that's like winning the Super Bowl."
