At the Advanced Ophthalmology Institute (AOI) in La Jolla, Dr. Mihir Parikh and his top-notch ophthalmic team provide customized solutions for each patient's eye care needs.

"Every patient's eyes are unique, and there are numerous options available today making up the total refractive solution that can help provide better vision," says Dr. Parikh. "With all these new technologies available, if your surgeon only does LASIK, you likely need a second opinion."

For nearly a decade, Dr. Parikh has performed more than 10,000 advanced LASIK and refractive procedures, specializing in Wave-front technology, all-laser LASIK and modern lens replacement technologies.

Dr. Parikh is starting his fifth NFL season with the San Diego Chargers as the official team ophthalmologist and LASIK surgeon, providing all the eye care for the team. "It's been a great partnership with the Chargers and mutually rewarding," says Dr. Parikh, who's performed LASIK on dozens of Charger players, coaches and executives.

Dr. Parikh's warm and friendly office provides a comfortable atmosphere for his patients. "Many of the surgeries are performed in our private surgical suite, where friends and families can watch the procedure from a cozy viewing area," says Dr. Parikh. "This really helps patients and their families relax and know they are in good hands."

"IT'S BEEN A GREAT PARTNERSHIP WITH THE CHARGERS AND MUTUALLY REWARDING."

Dr. Parikh has personally trained the AOI team and is proud of their extensive knowledge. "They know exactly what I need," says Dr. Parikh. "Having a team of eye care specialists like ours helps us get the best results for all our patients."

"With my practice in San Diego for almost 10 years, it's exciting to see my happy surgical patients around town," says Dr. Parikh. "It's always fun when patients stop to thank me for helping them become free of glasses and seeing better than ever. That's why I love what I do."
